

Blood Group Antigens & Antibodies
A guide to clinical relevance & technical tips
By
Marion E Reid & Christine Lomas-Francis

The authors are using royalties generated from the sale of this pocketbook for educational purposes to mentor people in the joys of immunohematology as a career. They will accomplish this in the following ways:

- sponsor workshops, seminars, and lectures
- sponsor students to attend a meeting
- provide copies of the pocketbook

(See www.sbbpocketbook.com)

The book, which costs \$25, can be ordered in two ways:

1. Order on line from the publisher at: www.sbbpocketbook.com
2. Order from the authors, who will sign the book. Send a check, made payable to “New York Blood Center” and indicate “Pocketbook” on the memo line, to:
Marion Reid, Laboratory of Immunochemistry
New York Blood Center
310 East 67th Street
NY 10021

Please include the recipient’s complete mailing address

About the book

This compact “pocket book” from the authors of the *Blood Group Antigen FactsBook* is a **must** for anyone who is involved in the laboratory or bedside care of patients with blood group alloantibodies.

The book contains clinical and technical information about the nearly 300 ISBT recognized blood group antigens and their corresponding antibodies. The information is listed in alphabetical order for ease of finding – even in the middle of the night. Included in the book is information relating to:

- Clinical significance of antibodies in transfusions and HDN
- Number of compatible donors that would be expected to be found in testing 100 donors. Variations in different ethnic groups are given
- Characteristics of the antibodies and optimal technique(s) for their detection
- Technical tips to aid their identification
- Whether the antibody has been found as an autoantibody
